

**2012/02/04 – Hope Area: Two-legged Gigantic Figure:** Two brothers used an unattended (off hours) vehicle scale in the Hope area and saw a very large man-like figure nearby on February 4, 2012 at 10:30 p.m. As they drove away from the scale the brother who was driving saw the figure in the car rear view mirror and remarked “That’s one big fella,” and slowed down. The other brother turned around and also saw the oddity; later referred to as “gigantic.” It was slightly hunched over and walking on two legs. They estimated it was about 50 feet from the scale and felt that it was waiting for them leave. Both brothers are very tall (6 feet, 5 inches, and 6 feet, 3 inches) and they believe the entity was much taller than they were. They watched and the figure cross the highway and disappear into the bush on the other side.

Thomas Steenburg and Bill Miller went to the location and investigated the incident, but did not find any footprints, despite snow on the ground directly at the back of the scale; however, the oddity may not have come from that direction. They were able to see video taken by the scale security camera, but it was pointing in another direction at the time the figure was seen.

Vehicle scale near Hope.
