

2010/08/00 – Sasquatch Provincial Park, Harrison Area. Dark Figure in the Night: A lady camped at Deer Lake in August 2010 with her husband wanted to use the outhouse during the night. She asked her husband to accompany her and on the way she heard rustling in the bushes. She alerted her husband, but they thought it was just a small animal of some sort. On the return trip the lady happened to look behind her and observed a dark upright figure covered in black hair standing a short distance away. She was so frightened she could not speak so just kept waking back to their camp site. She thought she might have been seeing things and did not tell her husband until the next morning. She mentioned that during the night she heard strange cries; similar cries had been heard the next year at Hicks Lake which is also in Sasquatch Provincial Park.
